Dear Mr. Halliday,

I am writing in regards to the product Battery Equalizer that we purchased from you earlier this season. We were having issues with our electric utility vehicles keeping their charge. Typically we were only getting battery life lasting between 1-2 hours before they needed re-charging. After using the Battery Equalizer we are now getting upwards of 6-7 hours of battery life.

This has greatly increased our use of this equipment. I thank you for introducing us to this great product.

Sincerely,

Kris Brown
Golf Course Superintendent
